DETAILED ACTION

Applicants' Amendment and Response, filed 11/4/09, have been entered. Claim 10 is amended; claims 5, 7-11 are pending and under current examination.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 5, 7-11 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. This is a <u>new matter</u> rejection.

37 CFR 1.118 (a) states that "No amendment shall introduce new matter into the disclosure of an application after the filing date of the application". This is a new ground of rejection, necessitated by Applicants' amendment to the claims.

Applicants have now amended claim 10 to recite that <u>complete</u> decellularization of the tissue is effected. Applicants do not specifically provide guidance to where support for the limitation can be found. The Examiner has noted previously that Applicants pointed to page 12, ¶24 for support for this claim language (see Response, filed 11/10/08). The Examiner notes that paragraphs 23-24 discuss the methods of the invention, and state that the methods result in decellularization, and that the "porcine pulmonary valve leaflet was decellularized even in deep interior portions by irradiation with microwave in conjunction with the

Art Unit: 1632

treatment of detergent solution." See p. 12, ¶24. Thus, this portion of the specification, although teaching that the tissue becomes decellularized, or that cellular components are removed, the as-filed disclosures does not provide support for complete decellularization of the tissue. The specification teaches that methods of the art do not provide complete decellularization (p. 4) but does not teach that the methods of the claimed invention would result in complete decellularization of the tissue. Accordingly, the limitation of "complete decellularization" is not supported by the as-filed disclosure.

To the extent that the methods are not described in the instant disclosure, claims 5 and 7-11 are also rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention, since a disclosure cannot teach one to make or use something that has not been described.

MPEP §2163.06 notes:

If new matter is added to the claims, the examiner should reject the claims under 35 U.S.C. 112, first paragraph - written description requirement. In re Rasmussen, 650 F.2d 1212, 211 USPQ 323 (CCPA 1981).

MPEP §2163.02 teaches that:

Whenever the issue arises, the fundamental factual inquiry is whether a claim defines an invention that is clearly conveyed to those skilled in the art at the time the application was filed...If a claim is amended to include subject matter, limitations, or terminology not present in the application as filed, involving a departure from, addition to, or deletion from the disclosure of the application as filed, the examiner should conclude that the claimed subject matter is not described in that application.

MPEP §2163.06 further notes:

When an amendment is filed in reply to an objection or rejection based on 35 U.S.C. 112, first paragraph, a study of the entire application is often necessary

Application/Control Number: 10/538,716 Page 4

Art Unit: 1632

to determine whether or not "new matter" is involved. Applicant should therefore specifically point out the support for any amendments made to the disclosure. (Emphasis added).

Claim Rejections - 35 USC § 102

The prior rejection of claim 12 under 35 U.S.C. 102(b) as being anticipated by Login et al (US 4994237, 1991) is rendered moot in view of Applicants' cancellation of the claim.

Claim Rejections - 35 USC § 103

The prior rejection of claims 5, 7-11 rejected under 35 U.S.C. 103(a) as being unpatentable over Login et al (US 4994237, 1991) in further in view of Giberson et al (US 6875583, 2005) and Boon et al (EP0362438A1, 1990) is withdrawn in view of Applicants' amendment to the claims which now require "complete decellularization of the tissue".

Art Unit: 1632

Conclusion

No claims are allowed.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thaian N. Ton whose telephone number is (571)272-0736. The examiner can normally be reached on 9-5:30 M·F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Peter Paras can be reached on 571-272-4517. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-21 7-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
